

CREATIVE OASIS FOR ALL

Cactus pots Project 1

For the making part of this project
you will need:

1. Your clay pack
2. Plastic tub or bowl for dropping clay scraps into
3. Your oven preheated to 50°C
4. Oven tray lined with baking paper
5. Paper towel / kitchen towel or newspaper
6. A bowl of warm water
7. Scissors (something to open the wrapped clay)
8. Two hand towels or tea towels
9. Sit at a low table (eg coffee table) or stand next to a taller table (eg dining table). Most of this project will be done by holding the pot in your hands.
10. A wooden cutting board / bread board. Can also just use the surface of the table but you may get clay on it!
11. Kitchen scales - not essential
12. Bits of clay may fall on the floor - try to work in an area without carpet or rugs. If you have carpet, it may be prudent to cover the carpet under where you are sitting with an old bed sheet or such like. White clay does not stain and can be vacuumed up when dry.
